

Serial No. 08/807,322  
Art Unit 2744

5

Application SERIAL NO. 08/807,322

**MARKED-UP CLAIM(S)**

6. (Amended) A device for personal communication, data collection and data processing, which is a small-sized, portable and hand-held work station including a housing and comprising a data processing unit; a display; a user interface; a number of peripheral device interfaces; at least one memory unit; a power source; and an application software, wherein the device also comprises:

a camera unit for obtaining and outputting image information, said camera unit comprising:

- a camera;
- optics connected to said camera;
- at least one memory unit;
- an output coupled to said data processing unit such that said data[e] processing unit processes image information output by said camera unit; at least a portion of said camera unit being located within said housing; and

wherein said device further comprises:

- means for transmitting image information processed by said processing unit to another location using a radio frequency channel; and
- a replaceable keyboard and a digitizer pad which are both adapted to couple to a same physical and electrical interface to the device.

15. (Amended) A device for personal communication, data collection[g] and data processing, which is a small-sized, portable and hand-held work station comprising a data processing unit; a display; a user interface; a number of peripheral device interfaces; at least one memory unit; a power source; a card slot; and application software, wherein the device also comprises:

Art Unit 2744

6

a circuit card electrically couplable to said card slot;  
a camera unit for obtaining image information, including a camera, optics, and an output, and with at least a portion of the camera unit integrated in said circuit card that is electrically couplable to the card slot of the device, and wherein said data processing unit is coupled to said output for processing image information output by said camera unit while said circuit card is electrically coupled to said card slot of said device, and  
means for transmitting image information processed by said data processing unit from said device to another location using a radio frequency channel.

31. (Amended) A portable computer device according to claim 29, further comprising a manual user input interface adapted to be physically and electrically coupled to, and decoupled from one of at least two types of user input device[s], wherein a first type of user input device is comprised of a keyboard, and wherein a second type of user input device is comprised of a digitizer pad.

45. (Amended) A portable cellular mobile phone comprising:  
a built in camera unit for obtaining image information[:];  
a user interface for enabling a user to input signals to operate the camera unit;  
a display for presenting image information obtained by the camera unit;  
a microprocessor adapted to control the operations of the camera unit in response to input signals from the user interface, and to process image information received by the camera unit; and  
means, coupled to said microprocessor, for transmitting image information processed by said microprocessor to another location using a radio frequency channel;

7

and wherein the camera unit comprises:

optics for obtaining image information;  
an image sensor for obtaining image information; and  
means for processing and for storing at least a portion of the  
image information obtained by the camera unit for later recall  
and processing.

55. (Amended) A device according to claim 54, wherein a first  
type of user input device is comprised of a keyboard, and wherein  
a second type of user input device is comprised[s] of a digitizer  
pad.

✓57. (Amended) A ✓device according to claim 56, wherein said  
[manual] user input device [interface] can be rotated to cover the  
display of said device.

70. (Amended) A portable notebook computer according to claim  
19, wherein ✓said camera unit is located entirely within the housing  
of the [ex]portable notebook computer.
